

## 1)

The diagram shows the orthographic projection of a mechanical part. The views are arranged as follows:

- Front View (FV):** Located at the top left. It shows a profile with a total height of 60. The left side has a vertical edge of 30. A horizontal segment of length 28 is followed by an inclined segment. The top surface has a horizontal section of length 10 and a vertical section of length 35. A vertical line is positioned 10 units from the right edge.
- Top View (TV):** Located at the bottom left. It shows a horizontal length of 20 and a vertical depth of 30. A vertical line is positioned 10 units from the right edge.
- Left Hand Side View (LHSV):** Located at the bottom right. It shows a profile with a total height of 60. The left side has a vertical edge of 20. A horizontal segment of length 28 is followed by an inclined segment. The top surface has a horizontal section of length 10 and a vertical section of length 35. A vertical line is positioned 10 units from the right edge.
- Right Hand Side View (RHSV):** Located at the top right. It shows a profile with a total height of 60. The left side has a vertical edge of 30. A horizontal segment of length 28 is followed by an inclined segment. The top surface has a horizontal section of length 10 and a vertical section of length 35. A vertical line is positioned 10 units from the right edge.
