"One cannot not communicate"

Communication happens all the time - also if we are not saying anything at all. If you don't believe it, try it out yourself! During your next conversation with your friend/partner just stop talking - it will be harder than you expect to keep up the silence for more than five or ten seconds, it will be awkward and the person you were having the conversation with will most probably be confused.

This shows that you communicated something - whether that was a lack of interest, ignorance or something else.

Communication is a big part of our life. It is a very important component among athletes, between athletes and coaches within a training, before and also during a competition, and between athletes and their parents.

Good ~~as that~~ (or bad) communication will highly influence you and what you need to succeed in everyday life and to reach our goals.
